Performance Measures Development Process

Appendix E to the Delta Plan contains all performance measures.
Available at: <http://deltacouncil.ca.gov/appendix-e-performance-measures-delta-plan>

Performance Measure Types

Administrative Measures

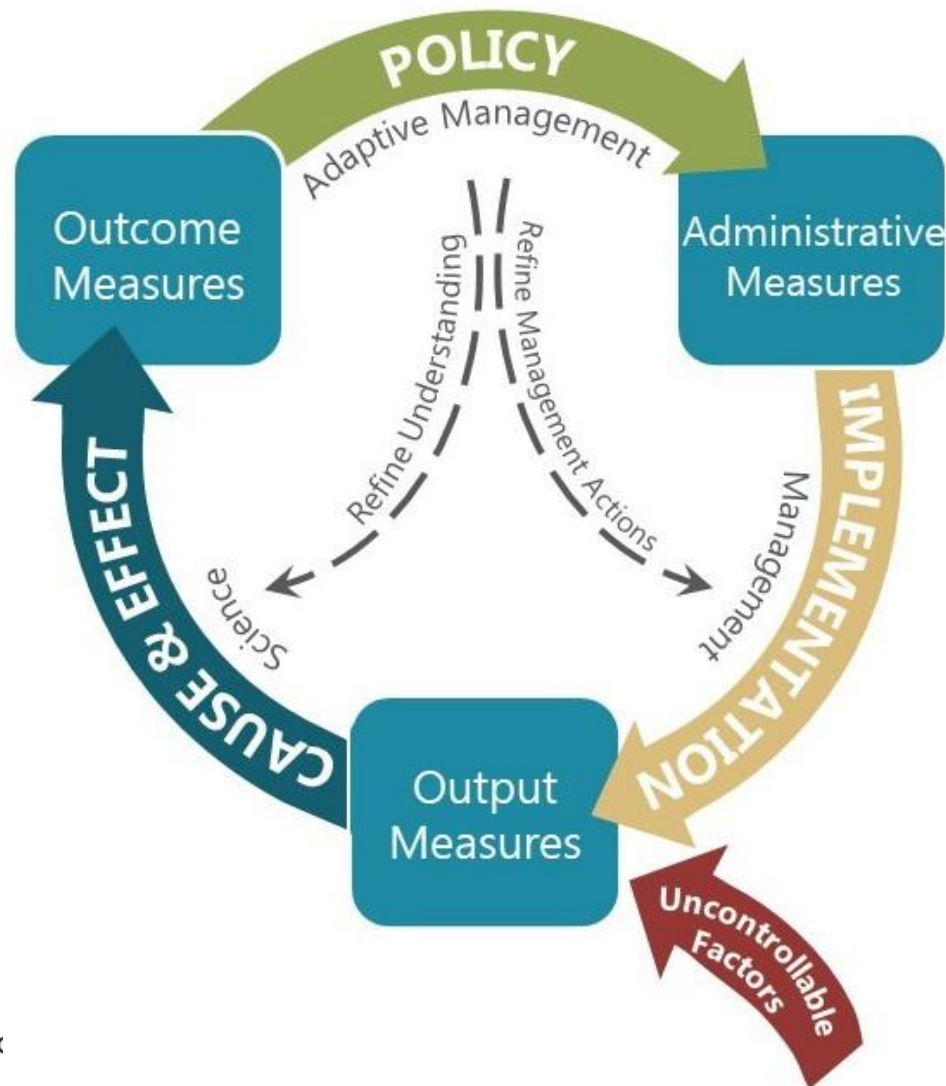

Decisions made by policymakers and managers

Output Measures

On-the-ground implementation of management actions, and natural events

Outcome Measures

Responses to management actions or natural outputs

Output/Outcome Criteria

Metrics define the unit(s) of measurement.

Baselines are standards or historical conditions for comparing with the current condition.

Targets are the desired future conditions or trends.

Performance Measure Types

Chapter 6: Improve Water Quality to Protect Human Health and the Environment

Performance Measure Type

ADMINISTRATIVE

OUTPUT

OUTCOME

Nutrients

Water Quality Objectives for Nutrients

Concentrations of Nutrients

Harmful Algal Blooms

Contaminants

Total Maximum Daily Loads

Reduction in Contaminants

Toxicity in Sediment Samples

- **Communicates performance metrics, baselines, and targets**
- **Tracks the status of the output and outcome measures**
- **Provides interactive graphs, charts and maps**
